PROFESSIONAL SUMMARY

Aspiring Software Development Engineer with a strong foundation in DSA and OOPs ,skilled in Python ,JavaScript and Java . Experienced in building scalable web applications using React.js, Node.js, FastAPI ,Express, and SQL/NoSQL databases, with a growing focus on AI-driven development and intelligent systems.

PROJECTS

Fake News Detection using Machine Learning
- Built an NLP model to classify news as fake or real using TF-IDF and ML algorithms.
- Showcased complete end-to-end ML pipeline design, model evaluation.
- Performed data cleaning, tokenization, and feature extraction with Scikit-learn.

Medical AI Assistant Bot
- Built a medical document-chat system using LangChain and FastAPI to query uploaded PDFs.
- Implemented a RAG pipeline with Groq (Llama 3) and Google embeddings for fast, cost-efficient responses.
- Integrated Pinecone vector database and developed a Streamlit UI with session-based chat history.

Aura Bags – E-Commerce Platform for Bag Retail
- Engineered 'Aura Bags,' a comprehensive e-commerce platform for bag retail
- Designed and implemented responsive frontend with React, ensuring optimal user experience
- Developed robust RESTful API backend utilizing Express and Node.js architecture.
- Orchestrated efficient data management through MongoDB and Mongoose integration.

SKILLS

Frontend Technologies
HTML, CSS, JavaScript,React.js,Tailwind CSS

Backend Technologies
Java,Node JS,Express JS,Python,FastAPI

Data Handling
Mongo DB

Cloud & DevOps Tools
Git , Github

EDUCATION

Gandhinagar Institute of Technology 2021 – 2025
(Bachelors Of Engineering) Ahmedabad, India

Gyandeep Higher Secondary School 2020 – 2021
(XII (NCERT)) Ahmedabad, India

The New Little Flower School 2018 – 2019
(X (GSEB)) Ahmedabad, India

EXPERIENCE

Software Engineering Intern - iMagic Solutions Pvt Ltd Nov 2025 – Jan 2026
- Implemented web scraping with Playwright to collect newspaper images and stored structured data in MongoDB.
- Integrated Google Gemini LLM APIs to build an image-based news query feature, enabling users to retrieve information from stored images.
- Contributed to backend integration using FastAPI.

AI Intern - GTU Design Innovation Center Jan 2025 – Apr 2025
- Built an advanced ergonomic posture tracking system for gym athletes ,brewing industry and construction workers using IMUs and real-time cloud monitoring.
- Tested the system by performing real-world movements at gyms, ensuring scalability, reliability, and accurate feedback under practical conditions.

Full Stack Intern - Elite Tech Nov 2024 – Dec 2024
- Developed responsive web interfaces using React.js for multiple remote projects, enhancing frontend architecture while strengthening technical and project management skills through Java and backend integration.

ACHIVEMENTS

Technical

- Pitched my project (Lift Guardian) at the Yukti Innovation Challenge, presenting an AI-based posture monitoring solution.
- Winner of Mini Hackathon at Open Source Weekend, delivering a team-based technical solution under time constraints.

Sports and Cultural

Football: Runner-up – L.D. College Football Cup, Khel Mahakumbh (Zonal), Impulso Sports Fest Winnersx2

Volunteer: Robowars – TechXtreme Fest, GTU Sankul Day, College Sports Fest

INTERESTS

- Football
- Swimming
- Travelling
- Singing
